About the Company

Crisis Guards Ltd. is a leading provider of integrated infrastructure for safety and crisis management, offering comprehensive and specialized solutions across various fields to ensure the protection of individuals and property. Since its establishment, the company has excelled in delivering distinguished services in fire safety, including the design of advanced detection, alarm, and suppression systems in accordance with the highest NFPA safety standards, under the supervision of a team of certified engineers.

The company also plays a prominent role in the field of water treatment through the design of modern treatment plants, conducting precise equipment inspections, and providing maintenance services of the highest quality. Additionally, we offer advanced technical solutions for safety, emergency, and disaster management, contributing to business continuity, and the protection of lives and property.

The company is proud of its certified partnership with "Termion LLC SPA Altermo", the globally renowned Russian company specialized in fireproof coatings. This partnership enables us to provide innovative and comprehensive solutions that adhere to the highest safety and quality standards.

We are committed to enhancing safety infrastructure locally and internationally by providing advanced solutions based on accredited standards and innovative crisis management strategies. Our goal is to achieve the highest levels of safety and sustainability for our communities and clients.

Fire Safety

Design and Engineering of Fire Protection Systems

- Specialists in designing fire detection, alarm, and suppression systems
